Needs and Uses: On April 18 2013, the Commission in a Fifth Report and Order, FCC 13-52, adopted changes to 47 CFR 90.425 of the Commission's rules to allow Private Land Mobile Radio (PLMR) licensees in the bands between 150 and 512 MHz that are licensed on an exclusive basis to transmit station identification information in digital format, on the condition that the licensee will provide the Commission with information sufficient to decode the digital transmission to ascertain the call sign transmitted. However, this gives a new group of licensee stations (PLMRs) an option regarding the method of transmission of required call sign information; it modifies the existing burden, and slightly increase the in-house cost burden - specifically the cost associated with providing the Commission sufficient information to decode the transmission - unless they choose the digital transmission option. Finally, the other part of this revision is adding one additional rule section which is 90.187 to this existing information collection.
